

- *An international journal for New Concepts in Global Tectonics* -

NCGT JOURNAL

Volume 3, Number 1, March 2015. ISSN 2202-0039. Editor: Dong R. CHOI (editor@ncgt.org). www.ncgt.org

Editorial board

Ismail BHAT, India (bhatmi@hotmail.com); Giovanni P. GREGORI, Italy (giovanni.gregori@alice.it);
Louis HISSINK, Australia (lhissink1947@icloud.com); Leo MASLOV, USA (lev.maslov@unco.edu);
Nina PAVLENKOVA, Russia (ninapav@mail.ru); David PRATT, Netherlands (dp@davidpratt.info);
Karsten STORETVEDT, Norway (Karsten@gfi.uib.no); Boris I. VASILIEV, Russia (tesla@poi.dvo.ru);
Takao YANO, Japan (yano@rstu.jp)

CONTENTS

From the Editor Earth's geodynamics interacting with solar system and planetary forces.....	2
Letters to the Editor	
Crustal oceanization in historical perspective. <i>Karsten M. STORETVEDT</i>	3
Reply to K. Storetvedt's letter, "Crustal oceanization in historical perspective". <i>Lidia IOGANSON</i>	5
Antagonism and emotions in science. <i>Karsten M. STORETVEDT</i>	7
Articles	
9/56 year cycle: earthquakes in South East Asia. <i>David MCMINN</i>	11
(Historic earthquakes and volcanic eruptions in South East Asia were found to fall preferentially in 54/56 year grids)	
Earthquakes occur very close to either 06:00 or 18:00 lunar local time, <i>Giovanni P. GREGORI</i>	21
(If an earthquake has to occur at some location and on some day, almost always it happens during either one of two time intervals close either to 06:00 or to 18:00 lunar local time).	
A lunar "mould" of the Earth's tectonics: Four terrestrial and four lunar basins are derivative of one wave tectonic process. <i>Gennady G. KOCHEMASOV</i>	29
(Any warping body standing waves originate from their movement in keplerian noncircular but elliptical or parabolic orbits; a common structuring process that is identified as the wave structuring)	
Tendency of volcano-seismic activity developed in the central part of the Honshu Arc, Japan. <i>Fumio TSUNODA, Takayuki KAWABE, Yoshihiro KUBOTA, Masashi HAYAKAWA and Dong R. CHOI</i>	34
(Based on the systematic northward movement of the volcano-earthquake process in the central part of the Honshu Arc, Japan, the sudden eruption of Ontake Volcano in September 2015 is considered a precursor for a major earthquake in the River Shinano Seismic Zone, Central Japan)	
The Australia-Antarctica dynamo-tectonic relationship: Meso-Cenozoic wrench tectonic events and paleoclimate. <i>Karsten M. STORETVEDT</i>	43
(This paper takes a fresh look at crucial facts from the Australia region and Antarctica and, by using the fundamental tenets of the inertia-driven Global Wrench Tectonics in light of the tectonic history of the two continents, builds up a new mega-scale coherent and sequential order of facts and phenomena)	
Short communication	
Ceres' two-faced nature: expressive success of the wave planetology. <i>Gennady G. KOCHEMASOV</i>	63
Discussions	
Earth expansion and thick air for ancient birds. <i>Robert J. TUTTLE</i>	65
Comment on Stephen Hurrell paper: paleogravity and fossil feathers. <i>Giovanni P. GREGORI</i>	68
Essays	
Massive changes in climate & sea level. <i>Peter M. JAMES</i>	71
The pattern of global cataclysms. <i>Peter M. JAMES</i>	87
Publications	
Solar flare five-day predictions from quantum detectors of dynamical sparse fractal flow turbulence: gravitational diminution and Earth climate cooling. <i>Reginald T. CAHILL</i>	98
On the relationship between cosmic rays, solar activity and powerful earthquakes. <i>Mikhail KOVALYOV and S. KOVALYOV</i>	98
