NCGT JOURNAL

Volume 2, Number 3, September 2014. ISSN 2202-0039. Editor: Dong R. CHOI (editor@ncgt.org) www.ncgt.org

Editorial board

Ismail BHAT, India (bhatmi@hotmail.com); Giovanni P. GREGORI, Italy (giovanni.gregori@alice.it);
Louis HISSINK, Australia (lhisink1947@icloud.com); Leo MASLOV, USA (lev.maslov@unco.edu);
Nina PAVLENKOVA, Russia (ninapav@ifz.ru); David PRATT, Netherlands (dp@davidpratt.info);
Karsten STORETVEDT, Norway (Karsten@gfi.uib.no); Boris I. VASILIEV, Russia (tesla@poi.dvo.ru);
Takao YANO, Japan (yano@rstu.jp)

CONTENTS

From the Editor Diwa tectonics.....	2
Letters to the Editor	
The 1977 Belousov letter to Khain, <i>Lidia IOGANSON</i>	3
Non-biological hydrocarbons, <i>Karsten M. STORETVEDT</i>	7
NCGT Journal, <i>Stephen FOSTER</i>	9
South Pacific-Siberia Geanticline, <i>Per MICHAELSEN</i>	9
Articles	
9/56 year cycle: earthquakes in the Pacific rim of South America, <i>David McMINN</i>	10
(Large seismic episodes in the Pacific Rim of South America were also hypothesised to fall preferentially in 54/56 year grids. This was confirmed after assessing all major quakes ($M \geq 7.8$) in Chile, Peru, Ecuador and Colombia over the past three centuries)	
Seismo-volcanic energy propagation trends in the Central America and their relationship to solar cycles, <i>Dong R. CHOI</i>	19
(The direction of energy movement is controlled by the level of thermal energy input into the Caribbean dome from the outer core, which is reversely correlated to the solar cycle: During the solar declining cycle, earthquake and volcanic swarms moved northward, but during the rising cycle, southward)	
A new method to calculate paleogravity using fossil feathers, <i>Stephen W. HURRELL</i>	29
(Values for gravity which would enable these birds to fly with weaker feathers are calculated based on the controversial theory that palaeogravity was less. These values are then compared with earlier estimates of palaeogravity derived from a range of other life forms from approximately the same time period)	
OLR and air temperature anomalies prior to big earthquakes – a case study on an Alaskan earthquake on June 23, 2014, <i>Natarajan VENKATANATHAN, Vladimir NATYAGANOV, and Arumugam SIGARVADIVEL</i>	35
(In this paper we discuss the appearance of anomalous air temperature at various levels of atmosphere and outgoing longwave radiation (OLR) above cloud level 13 days prior to an Alaskan earthquake occurred on June 23, 2014 with the magnitude of 7.9. This gives hope to the society that the “Air temperature anomaly” and OLR anomaly can be used as complementary methods to improve accuracy in predicting devastating earthquakes)	
Discussion	
<i>Darwin Rise</i>	
Sisyphus and oceanography, <i>N. Christian SMOOT</i>	41
Late Mesozoic tectono-magmatism in the West Pacific Ocean – Did the Darwin Rise demise or revive? <i>Takao YANO</i>	42
Sisyphus and the Darwin Rise, <i>N. Christian SMOOT</i>	54
<i>Rotation of Australia</i>	
Wrench tectonic history of Greater Australia, <i>Karsten M. STORETVEDT and Biju LONGHINOS</i>	61
Essay “Don’t think you can teach us anything”, <i>Karsten M. STORETVEDT</i>	70
Global Climate Corner Rising sea level forecasts: fact or fiction? <i>Cliff OLLIER</i>	87
Publications	
Earth’s crust of oceans, <i>Boris B. BLUMAN</i>	92
Dark Winter, <i>John L. CASEY</i>	94
About Face, why the world needs more carbon dioxide, <i>Arthur HUGHES, Madhav KHADEKAR and Cliff OLLIER</i>	94
Book review	
Michihei HOSHINO: The history of micro-expanding Earth, <i>Masahiro SHIBA</i>	95
News	
Commission on Tectonics of Ore Deposits of the International Association on Genesis of Ore Deposits (IAGOD), <i>Deru XU</i>	97
14 th IAGOD Symposium, Tectonics and Metallogeny session list of presented papers.....	98
