

- *An international journal for New Concepts in Global Tectonics* -

# NCGT JOURNAL

Volume 1, Number 1, March 2013 Editor: Dong R. CHOI (editor@ncgt.org) www.ncgt.org

## Editorial board

Ismail BHAT, India (bhatmi@hotmail.com); Peter JAMES, Australia (glopmaker75@hotmail.com); Giovanni GREGORI, Italy (giovanni.gregori@idac.rm.cnr.it); Leo MASLOV, Russia (ms\_leo@hotmail.com); Cliff OLLIER, Australia (cliff.ollier@uwa.edu.au); Nina PAVLENKOVA, Russia (ninapav@ifz.ru); David PRATT, Netherlands (dp@davidpratt.info); N. Christian SMOOT, USA (christiansmoot532@gmail.com); Karsten STORETVEDT, Norway (Karsten@gfi.uib.no); Takao YANO, Japan (yano@rstu.jp); Boris I. VASILIEV, Russia (tesla@poi.dvo.ru)

## CONTENTS

<b>From the Editor</b> NCGT Journal – an epitome of our victorious battles.....	2
<b>Letters to the Editor</b>	
Himalayan tectonics, <i>Vidyadhar RAIVERMAN</i> .....	3
Scientific paradigms, conscious ignorance and false play, <i>Karsten STORETVEDT</i> .....	10
Precambrian control of orogeny, <i>Peter JAMES</i> .....	12
<b>Articles</b>	
Rockall Plateau/Maury Seachannel interacton, <i>N. Christian SMOOT</i> .....	16
(The substratum is continental in origin, but later volcanism has overprinted that)	
54/56 year cycle: World megaquake clustering, <i>David MCMINN</i> .....	24
(A 9/56 year seismic cycle has been established for many regions and countries. For world mega quakes, a 54/56 year cycle was found to be more significant during the post 1900 era)	
Microseisms and spreading of deformation waves around the globe, <i>Pavel KALENDA, K. HOLUB, J. RUSAJOVA and L. NEUMANN</i> .....	38
(The noise data obtained from new apparatus for indirect stress measurement, i.e., vertical static pendulum was compared with microseisms recorded at the seismic station OKC (Czech Republic). It was documented that results of both methods of measurement were comparable, being estimated by a high value of correlation coefficient)	
The Christmas earthquakes: seasonal seismic recurrences near Parma, north-western Apennines, Italy? <i>Valentino STRASER</i> .....	58
(This paper discusses possible interpretations of the mechanisms of the Christmas earthquakes behind the phenomenon which may conceivably be triggered either by deformations of the geoid or gravitational effects occurring between the Sun and the Earth when it is at the perihelion of its orbit)	
Palaeomagnetism, plate motion and polar wander, <i>David PRATT</i> .....	66
(Theories based on palaeomagnetic data are often contradicted by geological and geophysical evidence, suggesting that palaeomagnetic data are not a reliable guide to past locations of the Earth's geographic poles. Moreover, palaeoclimatic and palaeontological data since at least the Late Proterozoic are consistent with continental and polar stability)	
<b>Comment and discussion</b>	
Origin of the Pacific ring of fire, <i>Takao YANO</i> .....	153
Further discussion of Nina Pavlenkova paper, <i>Karsten STORETVEDT</i> .....	159
<b>Publications</b>	
Global climate status report (GCSR), <i>John CASEY</i> .....	167
Tilts, global tectonics and earthquake prediction, <i>Pavel KALENDA, Libor NEUMANN and others</i> .....	169
<b>News</b>	
European Geosciences Union General Assembly 2013, <i>Valentino STRASER</i> .....	170
Global tectonics and Earth oceanization, Kaliningrad, Russia.....	171

For contact, correspondence, or inclusion of material in the NCGT Journal please use the following methods: NEW CONCEPTS IN GLOBAL TECTONICS. 1. E-mail: editor@ncgt.org, ncgt@ozemail.com.au, or ncgt@hotmail.com, each file less than 10 megabytes. For files larger than 10 megabytes, please send to ncgt@hotmail.com; 2. Fax (small amount of material): +61-2-6254 4409; 3. Mail, air express, etc., 6 Mann Place, Higgins, ACT 2615, Australia (files in MS Word format, and figures in jpg, bmp or tif format); 4. Telephone, +61-2-6254 4409. DISCLAIMER: The opinions, observations and ideas published in this journal are the responsibility of the contributors and do not necessary reflect those of the Editor and the Editorial Board. NCGT Journal is an open, refereed quarterly international online journal and appears in March, June, September and December.
