FROM THE EDITOR

This issue commemorates the 10th anniversary since our Newsletter first appeared in December, 1996. It enters the second decade from the next issue (no. 42, March, 2007). During the last ten years, the *Newsletter* has provided a platform to freely express and publish articles, ideas and discussions which would have been inhibited in mainstream journals. We are proud to say that, despite extremely hostile surroundings, our journal has now become a fully-fledged online international geotectonics journal supported by powerful, high-calibre editorial board members and several hundred enthusiastic readers in every corner of the world. The current issue which is full of enlightening, first-rate articles is the culmination of all the impressive achievements in the past.
