

NEWSLETTER

New Concepts In Global Tectonics

No. 11, June, 1999

Editors: J. M. Dickins and D. R. Choi

FROM THE EDITORS

We are receiving lots of interesting material for the Newsletter. Finances, however, are a problem. We have been receiving subscriptions at a steady but slow rate, but not sufficient at the moment to ensure the future of the Newsletter. We strongly encourage our supporters who have not done so to forward subscriptions and/or financial support. We shall cull from the mailing list, names of some colleagues from whom we have had no response to date and send them a letter seeking an indication of their future interest. If the position does not improve before the next newsletter we will have to cull further and colleagues who do not receive a copy will understand why and can seek restoration to the mailing list if this is their wish.

We have good news on the publication of the Proceedings of the Tsukuba Conference as a volume in the Himalayan Geology Series published by the Wadia Institute of Himalayan Geology, Dehra Dun, India. An Editorial Board is being set up and invitations to contribute will be sent out shortly.

Regarding our next NCGT Symposium, Dr T. Yano, Secretary-General of the Tsukuba Conference has received a letter from Dr A.A. Gavrilov proposing a joint symposium with The International Interdisciplinary Scientific Symposium "Regularities of the Structure and Evolution of the Geosphere" in Vladivostok in 2002. Our Japanese members have supported this proposal and further arrangements are being put in hand. *(continues to the next page)*

JOURNAL SUBSCRIPTION

We need your subscription or financial support now!

As indicated in From the Editors we have had to put some limits on the circulation of the Newsletter and need your support urgently for its continuation past the next few numbers. We have looked at E-mail/Internet but this does not seem to offer any financial advantages over airmail according to present technology. In some cases where airmail is very slow or unreliable we might undertake this although it may transfer cost from the sender to the receiver which might be prohibitive in certain countries.

The subscription is set at US\$30.00 or the equivalent for individuals and US\$50.00 for libraries. Bank drafts and personal cheques should be made out to J.M. Dickins or bank remittances to Commonwealth Bank of Australia, Canberra City, ACT, Australia, Account No. 2900 200 429. For personal cheques US\$6.00 should be added for cost of processing.

CONTENTS IN THIS ISSUE

From the editors.....	1	Oceanic lineaments, Central America.....	21
Letters to the editors.....	3	Antarctica magnetometer profiles.....	23
Articles		Diwa tectonics in Russia.....	26
Planetary collision with earth.....	5	Book review.....	28
Decollement beneath Kodiak Shelf, Part 3...9		News.....	29
Subduction on an expanding earth.....	20	Publications.....	30
