New Concepts In Global Tectonics

No. 19, June, 2001

Editors: J. M. Dickins and D. R. Choi

FROM THE EDITORS

We have received many contributions for this number, more than we have room for and we ask patience from those contributors whom we have not been able to include and these contributions will appear in the next issue. We cover quite a range of topics and we hope they will be of interest to our readers.

We are particularly pleased about the publication of the Proceedings of Tsukuba Conference in Himalayan Geology and are grateful to the Wadia Institute of Himalayan Geology for agreement to reproduction of the Overview from this volume in the Newsletter. We hope the overview will raise discussion on a number of conclusions which have

been drawn from the papers in the Volume. We are also grateful to Hetu Sheth for his review of the volume and also for the review of the thought provoking book of Ollier and Pain.

Inter alia we reproduce two Abstracts of published papers by Hetu Sheth. Although it has not been easy, we are getting a number of publications non-sympathetic to plate tectonics and the publication of Chris Smoot's paper in the Journal of Scientific Exploration is imminent. We hope to have a review of David Pratt's important paper in the next Newsletter.

There are other interesting contributions in the Newsletter. We wish you good reading.

FINANCIAL SUPPORT FOR NEWSLETTER

We are asking for financial support to the extent of US\$30.00 or more or the equivalent from individuals who are able and US\$50.00 or the equivalent for libraries. As only small sums of money are involved, in order to avoid bank charges which are not small, we ask you to make out bank drafts or personal cheques to J.M. Dickins or bank remittances to Commonwealth Bank of Australia, Canberra City, A.C.T., Australia, Account No. 2900 200 429.

A few cheques and/or drafts have been made out only to NCGT or New Concepts in Global Tectonics and these cannot be paid in and have to be returned.

Where the currency is internationally negotiable, personal cheques should be made in the currency of the country of origin e.g. if from Canada in Canadian Dollars because if made out in US\$ these cost \$40 or more in Australian Dollars in bank charges. Bank Drafts should be made out in Australian Dollars. If they are in US\$ similarly they cost A\$40 or more for bank charges.

If you require a receipt, would you please let us know when you are sending your contribution.

CONTENTS IN THIS ISSUE

| | |
|--|----|
| From the Editors..... | 1 |
| Articles | |
| Nature and problems of the crust and mantle..... | 2 |
| Political correctness in science..... | 6 |
| Recent advances in geophysics..... | 16 |
| Some comments on the structure of the east | |

| | |
|-------------------------------------|----|
| coast geosyncline, New Zealand..... | 17 |
| Book reviews..... | 21 |
| Publications..... | 24 |
