

New Concepts in Global Tectonics

NEWSLETTER

No. 59, June, 2011 ISSN: 1833-2560

Editor: Dong R. CHOI (editor@ncgt.org) www.ncgt.org Editorial board Ismail BHAT, India (bhatmi@hotmail.com); Peter JAMES, Australia (glopmaker75@hotmail.com); Leo MASLOV, Russia (ms_leo@hotmail.com); Cliff OLLIER, Australia (cliff.ollier@uwa.edu.au); Nina PAVLENKOVA, Russia (ninapav@ifz.ru); David PRATT, Netherlands (dp@davidpratt.info); N. Christian SMOOT, USA (christiansmoot532@gmail.com); Karsten STORETVEDT, Norway (Karsten@gfi.uib.no); Yasumoto SUZUKI, Japan (yasu-suzuki@vega.ocn.ne.jp); Boris I. VASILIEV, Russia (tesla@poi.dvo.ru)

CONTENTS

From the Editor Plate tectonics – gone with the great Japanese earthquake and tsunami.....	2
Letters to the Editor Earthquakes and surge tectonics, Peter M. JAMES.....	4
The subduction delusion: An example from the Molucca Sea, Peter M. JAMES.....	6
36-day solar-polar rotation drives Madden-Julian Oscillation, Bruce LEYBOURNE.....	7
Articles	
Evolution of the North Atlantic: Paradigm shift in the offing, Karsten STORETVEDT and Biju LONGHINOS.....	9
(Global wrench tectonics is applied to account for the physiographic and tectono-magmatic history of the region with emphasis on its late Cretaceous-Tertiary evolution) Dykes, global tectonics and crustal extension, Cliff OLLIER.....	49
(Volcanism does not take place in compressive areas, yet volcanoes and dykes are extensive in the Pacific ‘ring of fire’ and in island arcs. There is something wrong with the common assumption of compression in these areas of alleged subduction)	
Geological analysis of the Great East Japan Earthquake, Dong R. CHOI.....	55
(The Great East Japan Earthquake was caused by the reactivation of two Precambrian tectonic systems: 1) an ENE-WSW planetary fracture system running through the mainshock area, and 2) a N-S trending ridge system) March 2011 Great Offshore Tohoku-Pacific Earthquake from the perspective of the VE process, Fumio TSUNODA..	69
(A large crustal layer in the eastern Honshu region had been upwarping due to regional thermal expansion of the lower crust and the uppermost mantle prior to the occurrence of numerous romping earthquakes, which finally resulted in the M9.0 earthquake) Radio wave anomalies, ULF geomagnetic changes and variations in the interplanetary magnetic field preceding the Japanese M9.0 earthquake, Valentino STRASER.....	78
(Low frequency radio wave anomaly increased markedly from 1 March, plummeted on the day of earthquake, but again rose sharply from the next day. Magnetic field observed by satellite also followed the same trend as the radio wave fluctuation) 9/56 year cycle: Record earthquakes, David McMINN.....	89
(Earthquakes in the Americas, Western Europe and Japan often fell within the same sector of the complete 9/56 grid) 9/56 year cycle: Hurricane, David McMINN.....	106
(Major hurricanes in the Atlantic and the East Pacific were clustered within certain sections of the 9/56 year grid, far more than could be expected by chance. The sunspot cycle strongly influences weather activity and hurricane formation) Essay Aspects of planetary formation and the Precambrian Earth, Karsten STORETVEDT.....	113
Publications Cold Sun, John CASEY.....	137
Long period tidal force variations in the Earth-Moon planet system, Yu.N. AVSHYK and L.A. MASLOV.....	138
Video: Alternative Geology Documentary, Alan HAYMAN.....	138
News Conferences: EDPD-2011, India; IGC34 Brisbane; Earth expansion, Italy.....	139
Obituary Claude Blot, Jean-Pierre BLOT.....	141
Corrigendum.....	142
Financial contribution.....	143
Advertisements Nordic Geosolutions, Per MICHAELSEN.....	143
ClimateStat, Bruce LEYBOURNE.....	144
