

New Concepts in Global Tectonics NEWSLETTER

No. 56, September, 2010 ISSN: 1833-2560

Editor: Dong R. CHOI (editor@ncgt.org) www.ncgt.org

Editorial board: Ismail BHAT, India (bhatmi@hotmail.com); Peter JAMES, Australia

(glopmaker75@hotmail.com); Leo MASLOV, Russia (ms_leo@hotmail.com); Cliff OLLIER, Australia

(cliffol@cyllene.uwa.edu.au); Nina PAVLENKOVA, Russia (ninapav@ifz.ru); David PRATT, Netherlands

(dp@davidpratt.info); Giancarlo SCALERA, Italy (scalera@ingv.it); N. Christian SMOOT, USA

(christiansmoot532@gmail.com); Karsten STORETVEDT, Norway (Karsten@gfi.uib.no); Yasumoto

SUZUKI, Japan (yasu-suzuki@vega.ocn.ne.jp); Boris I. VASILIEV, Russia (tesla@poi.dvo.ru)

CONTENTS

IGC34 Brisbane NCGT session, Pursuit of a new geodynamic paradigm.....	2
Letters to the Editor	
New Concepts and the paths ahead, Peter M. JAMES.....	3
Luminous phenomena and earthquake, Taro Valley, Italy, Valentino STRASER.....	5
Jerks and tectonic vortex structures revisited, Bruce LEYBOURNE.....	7
Seismic synchronicity and the Sun-Earth interaction, Gerald DUMA.....	8
Articles	
Global tectonics: An ocean floor structure and age reality check, N. Christian SMOOT.....	9
Ubiquitously present lineaments in the ocean floors are aligned with those on land for all continents. No offsets occur between the two. This belies the idea of continental wrenching. Lunar periodicities and earthquakes, Vinayak G. KOLVNAKAR, Shashank S. DESHPANDE, Abhijeet S. MANJRE, Sandesh PANSARE, Samrudha MORE and Nisha THAKUR.....	32
Earthquake counts go up steadily from apogee to perigee and also towards full Moon. Lunar movement from ascending nodes to next ascending nodes also formulates certain earthquake pattern. Major earthquakes occur more in numbers when perigee coincides with full Moon and new Moon than at apogee with similar combination. A new theoretical conception concerning the tectonic processes of the Earth, Hatam GULIYEV.....	50
Evolution of the Earth in the framework of nonclassical linearized approach (NLA) has been studied as succession of changes of the unstable states of equilibrium, manifesting themselves in the form of anomalies of (background) uninterrupted development. New mechanisms of formation and the similar tectonic structures have been proposed. Blot's energy transmigration concept applied for forecasting shallow earthquakes: a swarm of strong deep earthquakes in the northern Celebes Sea in July, 2010, Dong R. CHOI.....	75
The strong energy discharged by the deep earthquakes is expected to reach the shallow depth in Molucca Sea in the latest 2012. Monitoring of precursory signals is urged. These deep shocks of unprecedented strength are considered to come from the increasing Earth core activity since 1990 which parallels the increasing solar activity. Crater formation possibly associated with an ascending thermal plume, Alexandre B. MEDVEDEV.....	86
A qualitative explanation of large crater formation on the surfaces of the Moon and Mercury is discussed in terms of the concept of thermal mantle plumes. Prerequisites for this hypothesis are revealed on the assumption that the mantle medium possesses a negative coefficient of thermal expansion. Essay Science in dishonest parade, Karsten STORETVEDT.....	99
Comments and replies	
Hatam Guliyev paper on theoretical conception, Evgeny M. MOROZOV.....	105
Publications	
John M. Quinn: Global Warming: Geophysical counterpoints to the enhanced greenhouse theory.....	108
